

Weakening an existing law that works just doesn't make sense, unless there is a hidden agenda. If a change is needed, why don't you make the national law as strong as NJ's?

While your at it, change the Anti-Spam law around to make it an opt-in like the Do Not Call law, instead of an opt out that clearly is a joke. My spam level has not gone down at all and most opt-out links are dead ends.
